

Keep your employees and customers safe

SUPERIOR DEFENSE MASK

The Superior Defense Mask acts as a personal face shield.

This innovative mask shields your face two ways:

- It acts as a barrier for your face- from your touching your face, and any other direct particle contact.
- It keeps your own saliva and mucus contained within your personal space.

These are cost effective and environmentally friendly. They are made with all natural paper fibers, and they can be recycled when disposed.

- The benefits of social distancing, in closer spaces.
- Readily available for any type of public contact, to reduce contagion.
- Store a few in your car, office, locker, toolbox, kitchen or bathroom drawers.
- Great for use when cleaning, shopping, or in other public spaces.
- Works with glasses, adjustable to fit different face sizes- one size fits all.

Where did this idea come from?

In mid-March, an Italian printing and manufacturing company, Grafica Veneta, began manufacturing face shields for low-risk citizens.

This effort to combat the spread of COVID-19 through marks one of the biggest successes from a private company in the fight to combat the spread of this epidemic. The product has been adopted by the Italian government in an effort to help protect citizens.

Now, Superior Packaging, the largest trade finisher in the United States, wants to bring the same proactive approach to the United States.

Giving Back during this time of need

Superior will donate the Superior Defense Mask to high risk non profit organizations like homeless shelters, food banks, non profit, child care and similar organizations.

1 case for every 10 cases sold at wholesale.
1 pkg for every 5 sold direct to the consumer.
